2. The 2d PS Bn in Halze was commanded by Lieutenant Vclav Dienstbier who, in October 1951, was detached to Moscow and was succeeded by Senior Lieutenant Mikula (fnu). Companies subordinate to the battalion were the headquarters company of 40 to 50 signal personnel, drivers and guards; one PS company in Pavluv Studenec (N 50/P 44) with a strength of 35 to 40 men; one PS company in Branka, about 4 km west-northwest of Halze; one PS company near Jalevy Dvur (N 50/P 44); one PS company in Broumov (N 50/P 55); and one PS company in Tisina in the forest northwest of Broumov. The switchboard was of Czech make.
4. On 21 October 1951, the battalion received recruits who had been inducted in July 1951, but the personnel strength remained the same because men were discharged at the same time. In November 1951, about 80 percent of the personnel were Czechs and 20 percent were Slovaks. (2)

5. An NCO course of about 200 men was conducted under the command of Captain Polozinec (fnu) in the castle of Chodova Plana (N 50/P 55) in the spring of 1951, and was to be completed in July. A signal-communications course and a course for mortar crews were also held in Chodova Plana from February to May 1951. (3)
6. Prior to October 1951, a strip of land about 6 to 8 km wide along the border, was referred to as the border zone. In late October 1951 this zone was subdivided and a strip about 200 to 500 meters wide, along the border, was placed off-limits and could be entered only if one were escorted by a member of the local PS company. Behind this off-limits zone, was the border zone, about 5 or 6 km wide, which could be entered only with a special permit. Large quantities of barbed wire began to arrive in Halze in the summer of 1951 and were later distributed to the various PS companies. In July 1951, Captain Pivecko (fnu), together with three civilians, rode in a sedan through the area controlled by the battalion.
